

Mark Gerard G. Gamboa

Frontend Developer

PROFILE

Aspiring front-end developer with a passion for building intuitive and visually appealing websites. I started coding during the pandemic and quickly learned the basics of web development. I'm known for being creative, curious, and always eager to learn new things. I enjoy working with others and turning ideas into real, working websites. I'm also learning new tools and trends to improve my skills. My goal is to build websites that not only work well but also look great and are easy to use.
